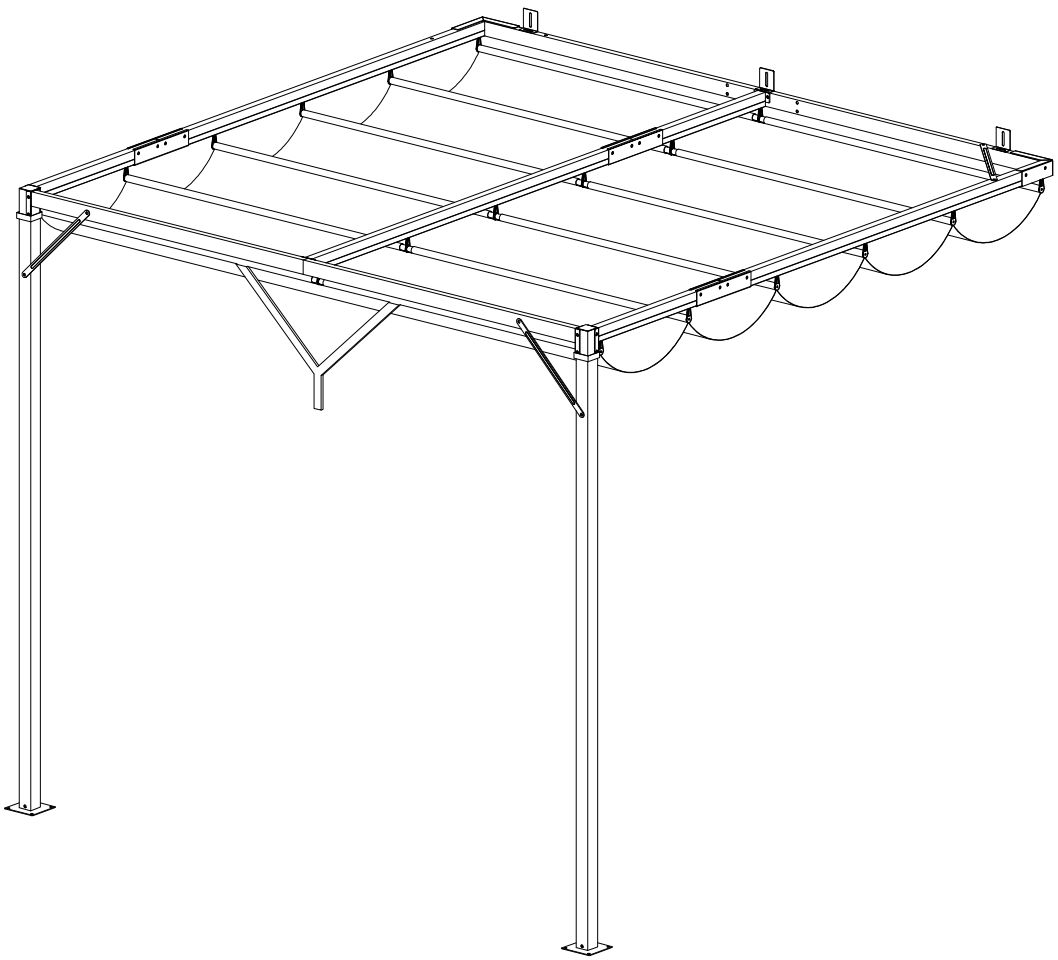
6.5x10



IMPORTANT

Thank you very much for choosing pergola.
Please take time to read these instructions thoroughly and follow each step carefully for safe and easy operation.
Keep this manual for future reference.
We would like to hear from you with any comments or suggestions. You can contact us to get assistance or to place your replacement part order form.

CAUTIONS:

1. When installing and assembling your pergola, it is recommended that two or more adults are involved.
2. Do not use the pergola during an electrical storm, as there is a remote chance of getting struck by lightning.
3. Do not climb on top of the pergola. Falling off the pergola can result in serious injury, possible even death.
4. Don not leave the pergola assembled when there is a risk of high wind, as possible damage will occur to the structure.
5. Do not use lanterns that contain open flames.
6. This package contains small items and plastic bags that should be kept away from children.
7. Ensure that all connectors & poles are firmly secured in position fully. It is important to do so before use so as to avoid collapsing or damage to the item, which could result in injury.
8. KEEP ALL FLAME AWAY FROM THIS SHELTER FABRIC. The fabric may burn if it is exposed to prolonged contact with a flame source. The application of any foreign substance to the fabric may render the flame-resistant properties ineffective.

USE&CARE:

1. This pergola is not a permanent structure and should be disassembled & stored away after use.
2. Do not repack your pergola until completely dry.
3. This pergola must not be left erect in windy conditions.
4. Steel components for garden accessories and furniture are treated with rust inhibiting paint that protects them from rust. However, due to the nature of steel, surface oxidation (rusting) will occur if this protective coating is scratched. This is a natural process. To minimize this condition, it is recommended that care be taken when assembling and andling the product in order to prevent the paint from being scratched. Surface rust can be removed easily using a very light application of common cooking oil. If surface oxidation (rusting) occurs and no measures are taken to correct it, the oxidation may start dripping onto the deck or patio, which may cause damaging stains that may be difficult to remove.
